About Music Details "
Life a struggle
Music is a part of our lives almost every day. Even if you do not consider yourself to be a big music fan, you still unconsciously listen to music every day. One big place where we hear music is on the television.

There is background and "mood" music in sitcoms and TV shows that you watch every day. We have all heard those catchy commercial jingles that stick with us throughout the day. These are just some examples of music.
Types of Music
There are so many types of music out there. You can buy CDs, listen to the radio and even listen to music or learn about music on TV. MTV, VH1, and various other television channels are geared towards music. You can turn on your radio and pick up the waves of many local and some even distant stations that play different types of music. Music is really everywhere and there is so much to choose from.
Some of the more common types of music are country, R&B, hip-hop, rock, classical and pop or dance. Many other categories have come from these basic genres. There are also many different categories according to a decade. For example, you can get hits of the 70s, 80s, 90s and today. These will play you all the hits and chart-toppers from that era."
